We offer folks a unique look at their furry, feathery or scaly "kids." By being such animal lovers ourselves, we think we can offer a connection and perspective that can better reflect the nature and spirit of someone's pet more so than a "department store" photographer. To capture the inherent spirit of your pet, we rely more on the physical and personality traits of the animal and less on props. If, however, Rover really loves his tutu, we'll gladly photograph him in it!

PHOTO SESSION INFORMATION

Sessions are conducted in the most comfortable environment for you and your pet: be that your home, backyard, park or office. Depending on the type of session, allow between 1 and 2 hours, possibly more if photographing multiple animals or hard to handle critters. This includes time for equipment set-up and breakdown as well as a chance for all of the two-legged and four-legged folks to greet and settle in. Additional fees apply for locales beyond Santa Maria or Paso Robles.
